- Intelligence Redefined
- Intelligence & identity
- January Focus-Skillsets 4 Robotics
- Alumni Expert Talk

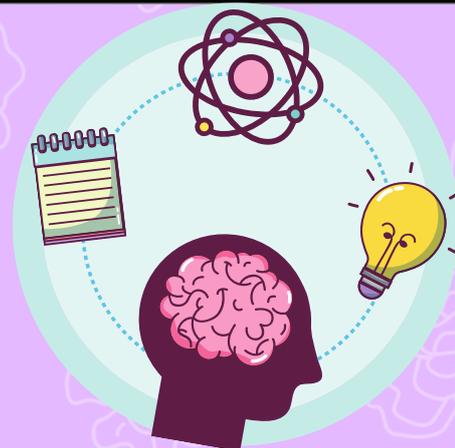

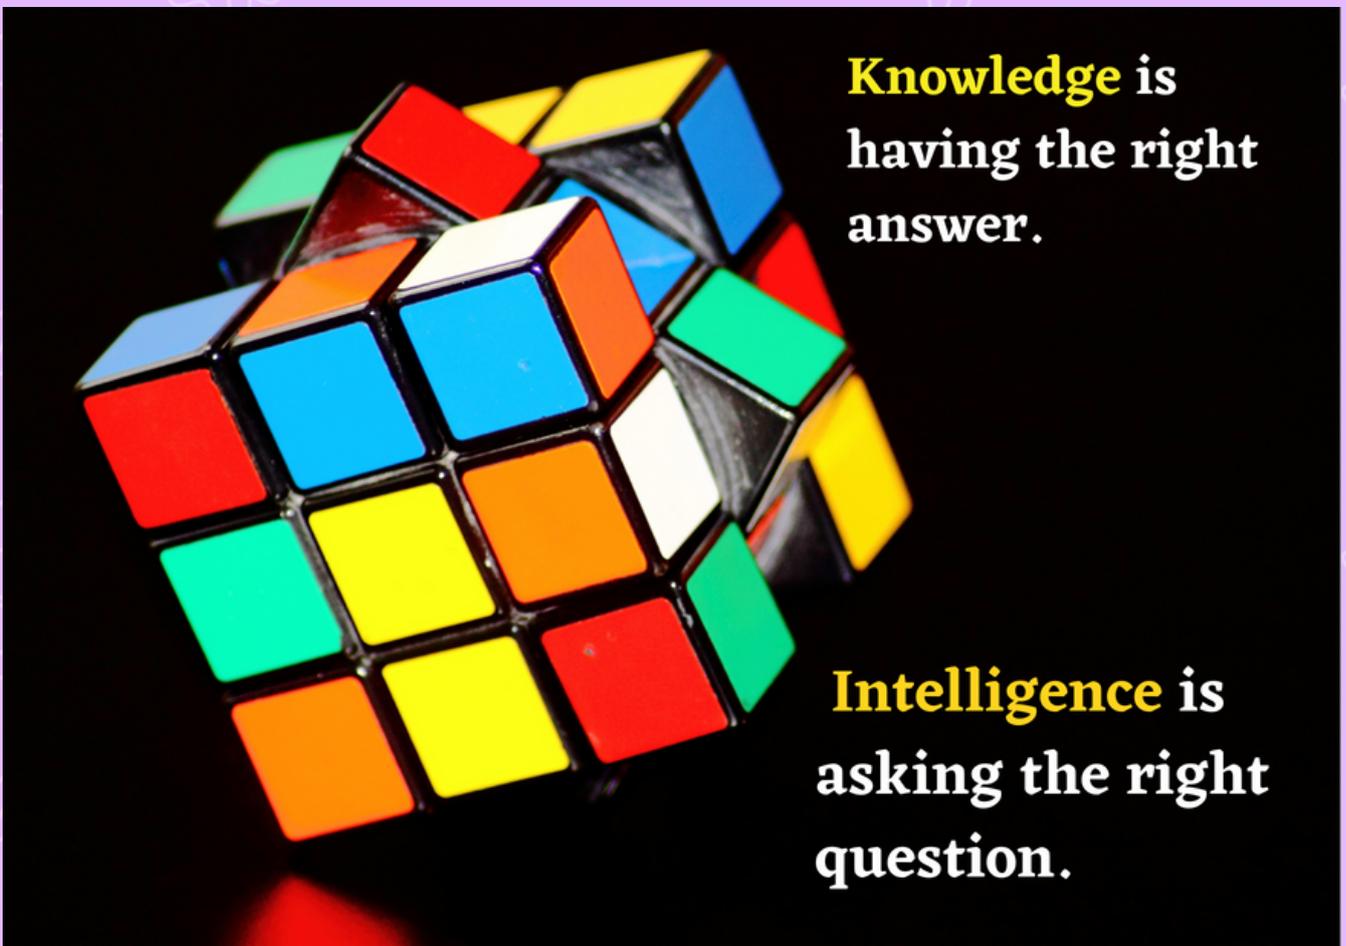

**"Children must be taught how to think,
not what to think."**

~Margaret Mead

Counsellor's Chronicles

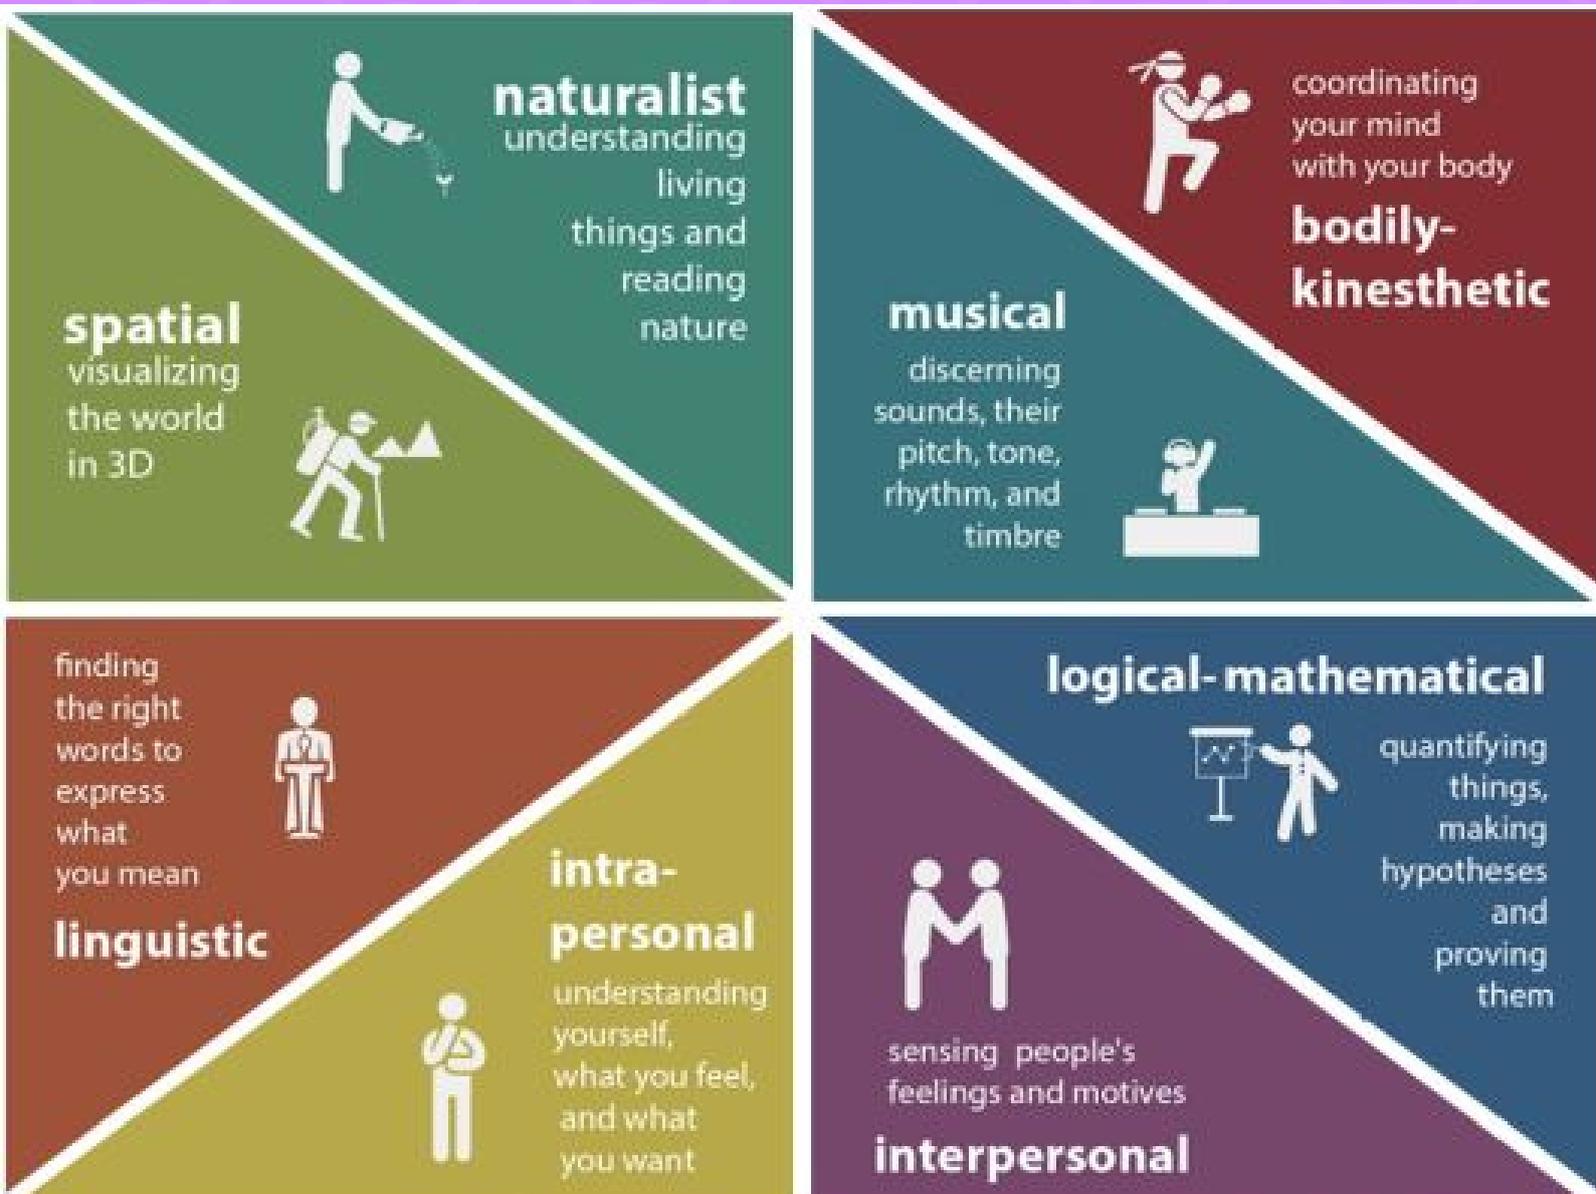

Intelligence Redefined

The quality of intelligence is a mandatory component in every choice we make. Be it the decision-making regarding a subject choice or planning for an undergraduate specialisation or even selecting portions of syllabus for exam preparation, our intelligence is at work 24/7!

We often come across the umbrella phrase She / he is extremely intelligent. The instant assumption is intelligence means top academic scores. The ability to retain academic concepts is not the sole defining framework. Exactly what is intelligence?

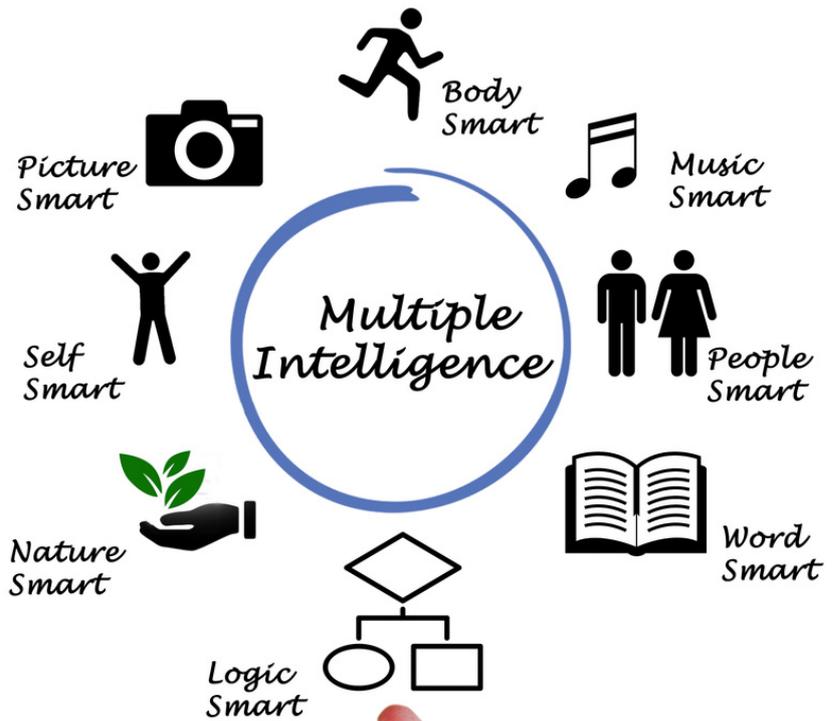

To understand intelligence, it is crucial to recognise that the much pursued quality is not a singular one, rather it has several components.

Each one of us is blessed with this quality. What we choose to evolve as in our lives and careers, depends on which coloured segment we resonate with. There are several scientific tests based on Multiple Intelligences and are often used as a reliable reference in selection of academic / creative streams.

IT'S ALL ABOUT
ME

INTELLIGENCE & IDENTITY

Once we recognise our special type of intelligence, the next step is to create a strong identity.

Identity is more than clinical and government regulatory details. It is essential to establish ourselves as an evolving global learner, who is keen to explore, yet is deeply rooted, a risk taker who transforms misses to precious life skills. To refer to a checklist may not be realistic, but we can definitely attempt to remember a few points as we carve out a new me !

I keep myself productively occupied -Internships, Community Projects .

I am open to adopting new styles of learning.

I am ready to be part of a team , to lead and work on excellence .

Through my class participation , I establish my perspective /identity.

My portfolio establishes ME !

My natural inclination shapes My choice

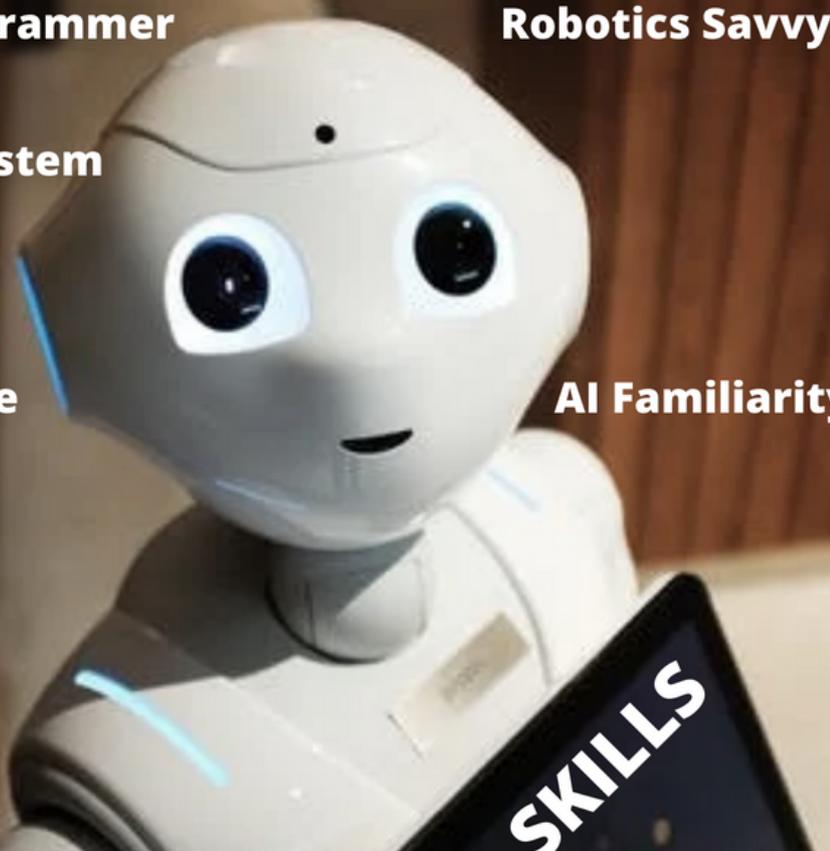

I invest in activities that boost my natural intelligence .

Focus

SKILLSETS 4 ROBOTICS

In continuation with last month's Focus on Robotics, we share with you a list of skills that are recognised as essential.

These skills or application habits start early. What we need to do is to identify and build them further with the right balance of knowledge and practice.

Mindset of a Programmer

Ease with the specialised ecosystem

Critical thinking

Adaptive & flexible

Complex problem-solving

Know Python like the back of your hand , maybe more!

Robotics Savvy

AI Familiarity

SKILLS

ALUMNI EXPERT TALK

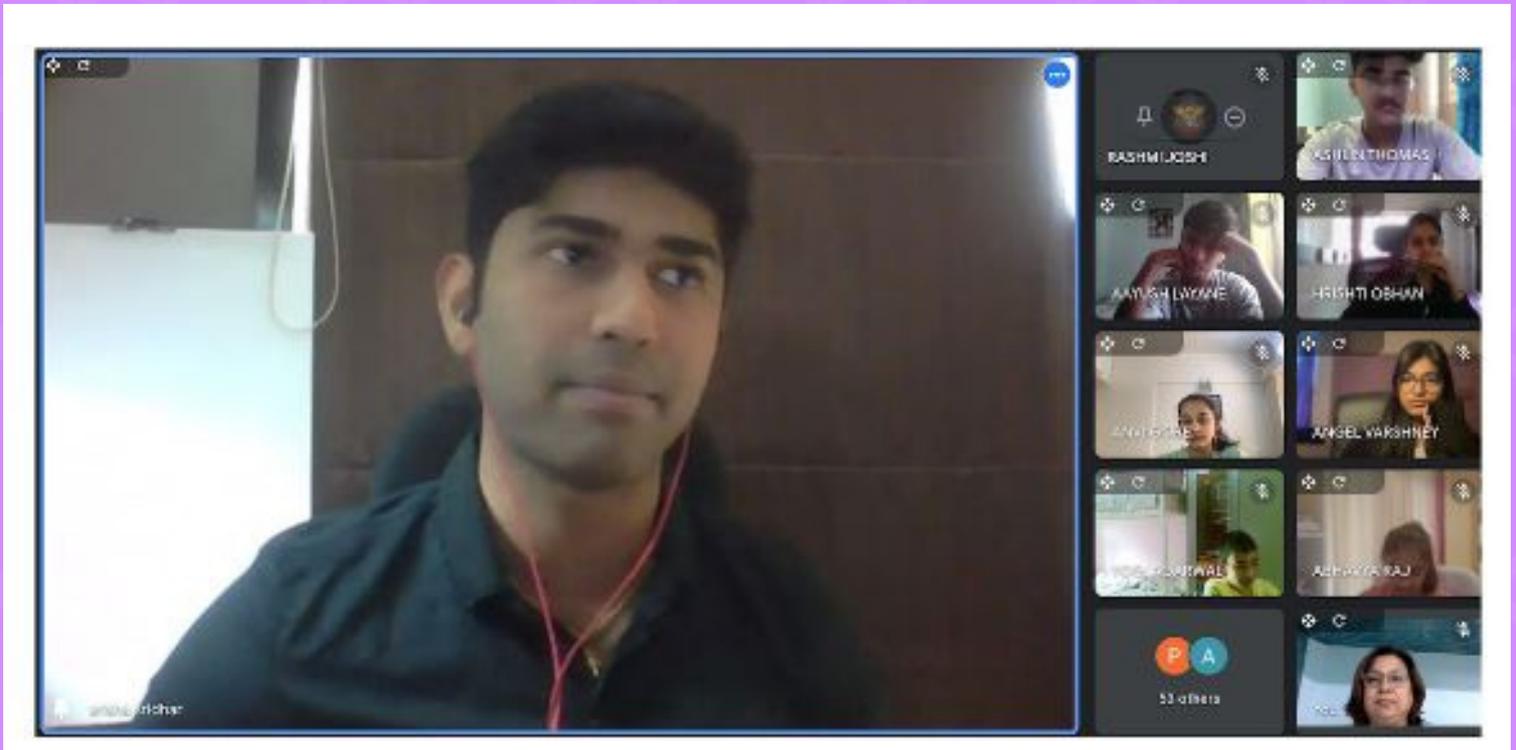

2022 began with the fabulous Alumni Expert Talk , delivered by Srisha Sridhar. On 17th January , Srisha shared reality bytes of his journey right from his DYPIS days to his current designation as Private equity Analyst in Hong Kong .

Srisha Sridhar

It was an enriching session that allowed our students to have a practical overview of the transition from school to college to career and the milestones that one crosses. Another important learning was that all milestones do not speak of success! The skills learnt at DYPIS helped Srisha handle the way ahead and life also made him acquire more to enable a smooth change.

FOUR WAYS WE LEARN
